

Maqsudjon Polatov

AI-First Builder — I ship production web products by directing AI agents

Welder by day, builder by night. Self-taught in 18 months: **180 public repositories**, **1,627 commits**, **11 live sites on their own domains** — specified, built, tested and deployed solo, with real users and paying clients.

Tashkent, Uzbekistan · polatovmaqsudjon1@gmail.com · +998 95 905 94 93 · t.me/mrbmp13 · github.com/maqsudjon-cell · maqsudjon.com

PUBLIC REPOS	COMMITTS	LIVE DOMAINS	DEPLOYMENTS	IELTS TESTS LIVE	MONTHS

PROFILE

I don't hand-write code, and I don't pretend to — my skill is turning an idea into a deployed, working product. I specify precisely, direct AI agents through plan → build → debug → deploy, test like a real user, and own everything around the code: architecture, domains, DNS, SEO, analytics, pricing and the client conversation. In 18 months that has produced a free IELTS platform teachers run weekly mock exams on, a Stripe-billed pricing system, a Python video engine, four client sites and my first paid product — all public, all live, all verifiable by clicking.

SELECTED WORK

Flarestamina — free IELTS ecosystem · founder & sole builder flarestamina.com · 2026

- **113 practice tests live** (73 Listening · 25 Reading · full mock · Cambridge · 10 tools) — each an individually deployed, self-contained page with audio, instant band scoring and answer review.
- **Essay platform** — Firestore-backed AI band-score feedback, an exam-fair editor (spellcheck, autocorrect and grammar hints disabled), focus mode, timer, colour-coded word count, and branded one-page PDF export.
- **Speaking lab** — the full official Jan–Apr 2026 question bank, 166 topics across Parts 1–3: in-browser recording, Supabase Storage audio, cache-first paint, debounced search, teacher band scores and peer feedback.
- **40-day challenge tracker** (PWA) — 265 tasks, real-time cross-device sync, streak heatmap, class leaderboard, gated teacher dashboard.
- Ran a full rebrand from *pangea8* losing no URLs, with sitemaps auto-generated by GitHub Actions.

Vanilla JS (no build step) · Firebase Auth + Firestore · Supabase Storage · PWA · GitHub Pages + Actions · Search Console · GoatCounter

Pierics — payment, metering & pricing system for an AI API aggregator Node · React · 2026

- Full-stack billing system: Express API (also deployed as a Vercel serverless function), React/Vite frontend, Supabase Postgres schema, Stripe integration, JWT auth and rate limiting.
- Designed a **three-tier pricing model** — free allowance, pay-as-you-go at 1.3× markup, and subscription — with the pricing engine written as a pure module and **13 tests proving the published price tables** match what the code charges.
- Idempotent SQL schema, single-source-of-truth plan config, and a public pricing page whose live cost calculator works standalone without the backend.

Node/Express · React + Vite · Supabase (Postgres/PLpgSQL) · Stripe · JWT · Vercel

Explainer Engine — topic in, branded explainer video out Python · then.uz · 2026

- Python pipeline that turns a text topic into a finished MP4: kinetic type, data visualisations and an original multi-section synthesised soundtrack — all generated from code, no stock footage.
- Architected around a **JSON spec as the contract**, so a human, the Claude API, or the ideate module can each author a video without touching engine code — decoupling creative direction from rendering.
- Ships three ways — CLI, local server, and a native desktop chat app — with parallel multi-core rendering.

Python · Anthropic Claude API · procedural audio synthesis · H.264 rendering · pywebview

Payvandchi & Reshotkachi — two workshop catalogue sites + image build pipeline 2 domains · 2026

- Catalogue sites for the metalwork trade I actually work in — **132 photographed patterns** each, ordered by number so a customer can call and say one number. Trilingual UZ/RU/EN, 8 pages per site.
- Wrote an **idempotent Node build pipeline** (CSV in, site out): three responsive WebP sizes per photo, EXIF rotation corrected, a dominant colour extracted as the pre-load background so **cumulative layout shift is zero**, gallery JSON rewritten and an image sitemap regenerated — recompressing only what changed.

Node ESM build scripts · WebP pipeline · vanilla JS · structured data · image sitemaps

COMMERCIAL & CLIENT WORK

chiziq / then chzq.uz · then.uz **Wedding Invitation Builder** first paid product

My own web studio. Productised offer — landing, business site, multilingual, catalogue — priced 1.5M–4M UZS with 1–3 day delivery, sold by shipping a **free working prototype first**. Portfolio embeds client sites as live iframes, not screenshots.

10 templates × 3 languages, exporting to PNG, PDF, animated video, or a shareable live link with the whole invitation encoded in the URL — no backend, no database. QR-coded venue map and countdown.

ZED AVLOD School

zedavlod.uz

Trilingual site for a private English / IELTS / CEFR school in Namangan. Only verified results published — state CEFR certificates and olympiad records, no invented numbers.

KVADRAT

kvdrt.maqsudjon.com

Offline-first m² calculator for welding shops, built from a real shop-floor need. Custom free-text parser handles quantities, decimals and five separator styles; computes projected-grille surface area, renders a live diagram, exports PDF and Telegram text.

CTN Language Centre

ctnlc.uz

Marketing site for a Tashkent language centre — trilingual, dark mode, course funnels and a trial-lesson flow, plus a hosted mock-test platform serving full listening tests with audio.

ID Photo Maker

on-device AI

Passport and visa photo tool where cropping, resizing and AI background whitening all run in the browser. The photo never leaves the device — trustworthy by construction, not by promise.

SKILLS

AI development	Claude Code daily (plan → build → debug → deploy) · agent and workflow design · specification and prompt writing · Anthropic API integration · reviewing product behaviour instead of syntax
Web	JavaScript, HTML5, CSS3 · single-file apps with no build step · React + Vite · Canvas 2D · Web Audio · PWA · mobile-first · dark mode · UZ / RU / EN localisation
Backend & data	Node / Express · Vercel serverless · Firebase Auth · Firestore modelling, security rules and real-time sync · Supabase Postgres and Storage · Stripe billing · JWT auth · rate limiting
Python	Generative media pipelines · procedural audio synthesis · CLI and local-server tooling · parallel multi-core rendering
Ship & operate	Git & GitHub · Pages · Actions (automated sitemaps) · Node build scripts and image pipelines · staging → production flow · custom domains, DNS and HTTPS · Vercel
Growth & product	Google Search Console · SEO, XML and image sitemaps, structured data · GoatCounter · pricing and packaging · brand naming and rebrand migration · client scoping and delivery
Hands-on trades	Certified welding and electrical work · logistics ops: DAT, Samsara, Amazon Relay, RTS Pro, DataQ
Honest limit	I read and adjust HTML / CSS / JS with AI help, but I am not a from-memory hand-coder — I am the director in the loop, not the typist.

EXPERIENCE

Independent AI-First Builder — solo

Feb 2025 — present · Tashkent

- Shipped 11 products onto their own domains from first spec to live DNS, working alone in evenings and on days off while welding full-time.
- Built and maintain the platform real IELTS students use daily and teachers use for weekly mock exams; every platform I build ships with a teacher dashboard.
- Delivered paid client work end to end: scoping, free prototype, build, launch, handover, support.

Welder — private workshop

2023 — present · Tashkent

- Fabrication and on-site installation of window grilles, balcony railings and canopies, measured and fitted to real-world tolerances.
- The trade taught the discipline I apply to software: measure carefully, join cleanly, test the seam under load before calling it done.

EDUCATION & CERTIFICATES

BA, Philology and Language Teaching: English — University of Exact and Social Sciences (AIFU), Tashkent · first year, full-time

2026 — 2030

Trucking Experts Logistics Course — Certificate with First Class Honours

Jul 2026

Trucking MBA School, Tashkent — dispatching, fleet management, FMCSA safety and compliance, driver recruiting and screening, invoicing and payroll, RPM / CPM / MPG profitability analysis. Certificate ID 1000300.

Electrician — Red Diploma (with distinction)

Vocational School No. 1, Namangan

LANGUAGES

English — IELTS Academic · CEFR B2

tested 12 Aug 2026 · TRF 26UZ533712POLM004A

6.0 LISTENING	5.0 READING	5.5 WRITING	6.5 SPEAKING	6.0 OVERALL
------------------	----------------	----------------	-----------------	----------------

I build IELTS software and sit the exam myself, so I work daily with the material I ship. Speaking 6.5 is my strongest skill — I am comfortable in an English interview. **Uzbek** native · **Korean** basic.

Availability

full-time · immediate

Remote or Tashkent. I still weld for a living today; the day I am hired to build, the welding mask comes off for good. Happy to take a paid trial task or demo any product live on a call.
