

Maqsudjon Polatov

AI-First Product Builder — full-stack web products, specified and shipped solo

Tashkent, Uzbekistan (UTC+5) · polatovmaqsudjon1@gmail.com · +998 95 905 94 93 · Telegram t.me/mrbmp13

GitHub github.com/maqsudjon-cell · Portfolio maqsudjon.com · Flagship product flarestamina.com

Open to full-time remote (Europe / US / Gulf overlap) or on-site in Tashkent

180 public repositories · 1,627 commits · 12 products on their own domains · 167 deployments · 113 IELTS tests in production · 18 months, solo

PROFESSIONAL SUMMARY

Self-taught product builder who ships complete, production web applications by directing AI coding agents end to end — specification, architecture, build, debugging, deployment and operations. In 18 months I have shipped 12 products onto their own domains: a free IELTS platform that teachers in Tashkent use for weekly mock exams, a Stripe-billed pricing and metering system on Node and PostgreSQL, a Python media-generation pipeline, and four commercial client sites. I own the full lifecycle — requirements, data modelling, front end, back end, CI, DNS and HTTPS, SEO, analytics, pricing and the client relationship — and I am explicit about how I work: I direct AI agents rather than write code from memory. Every claim here is publicly verifiable.

TECHNICAL SKILLS

AI development	Claude Code (daily driver) · Anthropic Claude API · AI agent and workflow design · specification and prompt engineering · AI-assisted debugging · evaluating agent output against product behaviour
Frontend	JavaScript (ES6+) · HTML5 · CSS3 · React · Vite · Canvas 2D · Web Audio API · PWA · responsive, mobile-first UI · internationalisation (UZ / RU / EN)
Backend & data	Node.js · Express · REST API design · serverless (Vercel) · Firebase Auth · Cloud Firestore modelling, security rules and real-time sync · Supabase · PostgreSQL · Stripe billing · JWT · rate limiting
Python	Generative media pipelines · procedural audio synthesis · CLI and local-server tooling · multiprocessing
DevOps & delivery	Git · GitHub · GitHub Actions (CI, automated sitemaps) · GitHub Pages · Vercel · Node build scripts and image pipelines · staging → production · custom domains, DNS, TLS/HTTPS provisioning
Growth & product	Technical SEO · Google Search Console · XML and image sitemaps · JSON-LD structured data · analytics · pricing and packaging · brand migration without URL loss · client scoping
Also	Certified welding and electrical work · logistics ops tooling: DAT, Samsara, Amazon Relay, RTS Pro, DataQ

LIVE PRODUCTS — 12 DOMAINS IN PRODUCTION

DOMAIN	WHAT IT IS — BUILT WITH
flarestamina.com	Free IELTS platform — 113 tests, AI essay feedback, speaking lab, 40-day tracker. Firebase · Supabase · PWA
maqsudjon.com	Portfolio, case studies and build log; real-time video→ASCII renderer. Canvas 2D · PWA · RSS
chzq.uz	“chiziq” — my web studio: productised sites, Telegram bots, mini apps. JSON-LD · theming
then.uz	“then” — second studio brand and home of the Explainer Engine video pipeline. Static site · Python
zedavlod.uz	Client — ZED AVLOD School, Namangan: trilingual site for an English / IELTS / CEFR school. UZ·RU·EN · Search Console
ctnlc.uz	Client — CTN Language Centre, Tashkent: marketing site plus hosted mock tests with audio. UZ·RU·EN · dark mode
payvandchi.maqsudjon.com	Client — metalwork catalogue, 132 patterns. Node build pipeline · WebP · image sitemap
reshotkachi.maqsudjon.com	Client — second catalogue on the same pipeline, 3D gallery-wall front page. Node pipeline · Canvas
kvdrt.maqsudjon.com	KVADRAT — offline m² calculator for welding shops; free-text parser, PDF export. Vanilla JS
pierics.com	Daily word game doubling as an IELTS vocabulary trainer; hand-curated answer list. Vanilla JS · no backend
minnos.cc	Minnos — English idioms taught one cat at a time, with audio and Uzbek translations. Vanilla JS · single file
pangea8.com	Legacy brand, permanently redirected to flarestamina.com after a rebrand with no URL loss. 301 strategy

SELECTED PROJECTS — DETAIL

Flarestamina — free IELTS platform · founder and sole builder flarestamina.com · 2025–2026

- Built and operate a platform with **113 practice tests in production** (73 Listening, 25 Reading, a full mock, Cambridge material, 10 tools) — each a self-contained page with audio, instant band scoring and answer review.
- Shipped an **essay platform on Firestore** with AI band-score feedback, an exam-fair editor (spellcheck, autocorrect and grammar hints disabled), focus mode, exam timer and branded PDF export.
- Shipped a **speaking lab** carrying the full official Jan–Apr 2026 question bank — 166 topics across Parts 1–3 — with in-browser recording, Supabase Storage, cache-first rendering, teacher scoring and peer feedback.
- Shipped a **40-day study tracker as an installable PWA**: 265 tasks, real-time sync, streak heatmap, leaderboard, permission-gated teacher dashboard.
- Migrated the product to a new brand **without losing a single URL**, with sitemaps generated by GitHub Actions and indexing monitored in Search Console.

Stack: Vanilla JavaScript (no build step), Firebase Auth + Firestore, Supabase Storage, PWA, GitHub Pages, GitHub Actions

Pierics — payment, metering and pricing system for an AI API aggregator Node · React · 2026

- Designed and built a **full-stack billing system**: an Express REST API that also deploys as a Vercel serverless function, a React/Vite frontend, a PostgreSQL schema on Supabase, Stripe integration, JWT authentication and request rate limiting.
- Modelled a **three-tier commercial structure** — free allowance, pay-as-you-go at 1.3× cost markup, and subscription — and implemented the pricing engine as a pure, side-effect-free module.
- Wrote **13 automated tests asserting the published price tables match what the code actually charges**, so pricing and billing logic cannot drift apart.

Stack: Node.js, Express, React, Vite, Supabase (PostgreSQL), Stripe, JWT, Vercel serverless

Explainer Engine — text topic in, branded explainer video out Python · 2026

- Built a Python pipeline that renders a finished MP4 from a text topic — kinetic typography, data visualisations and an original multi-section synthesised soundtrack, **entirely generated from code** with no stock footage or licensed music.
- Architected the system around a **JSON specification as the contract**, so a human author, the Claude API, or the built-in ideation module can each produce a video without any change to engine code — decoupling creative direction from rendering.
- Packaged three interfaces over one engine — CLI, local server and a native desktop app — with frame rendering parallelised across CPU cores.

Stack: Python, Anthropic Claude API, procedural audio synthesis, H.264 encoding, pywebview

EXPERIENCE

Independent Product Builder — self-employed, solo Feb 2025 — present · Tashkent

- Shipped 12 products onto their own domains from first specification to live DNS, working alone in evenings and on days off while holding a full-time manual job.
- Operate a production platform used daily by real IELTS students and by teachers running weekly mock exams; every platform ships with a teacher dashboard.
- Delivered paid client work end to end — scoping, free prototype, build, launch, domain handover and support — for a school, a language centre and two workshops; handle all DNS, TLS, CI, SEO and analytics.

Welder — private workshop 2023 — present · Tashkent

- Fabrication and on-site installation of window grilles, balcony railings and canopies, measured and fitted to real-world tolerances on customer premises. The trade set the discipline I apply to software: measure carefully, join cleanly, test the seam under load before calling it finished.

EDUCATION & CERTIFICATIONS

BA, Philology and Language Teaching: English — full-time, first year 2026 — 2030

University of Exact and Social Sciences (AIFU), Tashkent, Uzbekistan.

Trucking Experts Logistics Course — Certificate with First Class Honours Jul 2026

Trucking MBA School, Tashkent — dispatching, fleet management, FMCSA safety and compliance, driver recruiting and screening, invoicing and payroll, RPM / CPM / MPG profitability analysis. Certificate ID 1000300.

Electrician — Red Diploma, graduated with distinction Vocational School No. 1, Namangan

LANGUAGES & AVAILABILITY

Uzbek native · **English** professional working proficiency — **IELTS Academic, Overall Band 6.0, CEFR B2** (12 August 2026; Speaking 6.5); I write all documentation and product copy in English and ship interfaces in Uzbek, Russian and English · **Korean** basic.

Available full-time, immediately — fully remote with European, US or Gulf overlap from Tashkent (UTC+5), or on-site. I currently weld for a living; the day I am hired to build, that stops. Happy to take a paid trial task or walk through any product live on a call.

Verification. Repo and commit counts from github.com/maqsudjon-cell (account opened Feb 2025); all 12 domains resolve over HTTPS; IELTS from official Test Report Form 26UZ533712POLM004A, verifiable at ielts.org/verify.
